DRAW - VAEs Generative Models

Time →

Gregor *et al.*, DRAW: A recurrent neural network for image generation. ICML'15

Model

Approach

- Use the DRAW model to generate texture.
 - Generated images are small (28x28 only).

Approach

- Use the DRAW model to generate texture.
 - Generated images are small (28x28 only).
- Loss function:
 - Cross entropy

Approach

- Use the DRAW model to generate texture.
 - Generated images are small (28x28 only).
- Loss function:
 - Cross entropy \rightarrow pixel-to-pixel correspondence is not suitable for texture

Approach

- Use the DRAW model to generate texture.
 - Generated images are small (28x28 only).
- Loss function:
 - Cross entropy → pixel-to-pixel correspondence is not suitable for texture

Approach

- Use the DRAW model to generate texture.
 - Generated images are small (28x28 only).
- Loss function:
 - Cross entropy → pixel-to-pixel correspondence is not suitable for texture

- Filter-bank (FB) response.

Synthesizing Larger Texture

How can we synthesize larger texture?

Synthesizing Larger Texture

- Train networks to generate immediate neighbors.

- Feed generated neighbors as input to generate more tiles, and so on...
